

Hello,

I'm **Niko Okta**. I **design/develop** website and **animate** 2D/3D graphics
I help startups and companies to make their mark since 2010.

Front-end development is my strongest field with equal balance of user interface design and back-end development. As a full-stack, I am able to visualise my ideas and build them completely by myself. I can come up with a design that is not only aesthetically appealing but functional, too.

I am an advocate for a proper workflow, structured design and detailed orientation.
